Dec. 1936

Specimens in J. H.

copy 25

BOMBACACEAE

W. 3792 Bombax sp. no flowers

TILIACEAE or ELEOCHARP. (I cant recall which)

W. 3672 Vallea cordifolia R. & P.

W. 4873 Crinodendron Hookerianum Gay

W. 4972 " Patagua Molina

W. 5172 " "

M. 4065 Triumfetta acuminata HBK.

FLACOURTIACEAE

W. 3785 Abatia grandiflora Irmischer ined.

W. 4717 Azara lanceolata Hook. f.

W. 4804 " "

W. 4559 " celastrina Don.

W. 5130 " "

W. 4979 " integrifolia R. & P.

W. 5132 " Gilliesii H. & A.

EMPETRACEAE

W. 4891 Empetrum rubrum Vahl

ERICACEAE

M. 4272 Befaria glauca H. & B., var. coarctata (H. & B.) Mansf. & Sleum.

M. 3779 Gaultheria sp.

W. 3767 Vaccinium floribundum HBK.

W. 4699 Pernettya myrtilloides (Poepp. & Endl.) Zucc.

W. 4683 " "

W. 4890 " "

W. 4830 " "

W. 4893 " "

W. 3780 " "

W. 4695 " furiens (H. & A.) Kl.

W. 4388 " "

BORAGINACEAE

- W. 3900 *Cordia decandra* H. & A.  
M. 4009 " *macrocephala* (Desv.) HBK.  
W. 3575 " *lutea* Lam.  
  
M. 4029 *Heliotropium arborescens* L.  
M. 4080 " "  
W. 3886 " *stenophyllum* H. & A.  
W. 3875 " *pycnophyllum* Phil.  
M. 4087 " *angiospermum* Murr.  
  
M. 4093 *Tournefortia microcalyx* (R. & P.)  
  
M. 4178 *Coldenia litorale* Phil.?  
W. 3572 " *paronychioides* Phil.  
  
M. 4195 *Lithospermum Shepardae* Johnston  
  
M. 4185 *Plagiobothrys Kunthii* (Walp.) Johnston  
W. 4759 " *verrucosus* (Phil.) Johnston  
  
W. 5110 *Cynoglossum zeylanicum* Thunb.  
W. 4975 " *limense* Willd.  
  
W. 4767 *Amsinckia hispida* (R. & P.) Johnston  
  
W. 5102 *Echium vulgare* L.  
W. 3986 " "  
  
M. 4072 *Borago officinalis* L.  
  
M. 4181 *Cryptantha granulosa* (R. & P.) Johnston

POLEMONIACEAE

- M. 4613 *Gilia foetida* Gillies  
M. 4617 " *crassifolia* Benth  
  
W. 4763 *Collomia biflora* (R. & P.) Brand  
W. 5113 " "  
  
W. 3850 *Cantua buxifolia* Juss.  
W. 3688 " "

HYDROPHYLLACEAE

- W. 6092 *Phacelia pinnatifida* Griseb.  
M. 4367 " "  
W. 6082a " *nana* Wedd.  
W. 5092 " *magellanica* (Lam.) Cov.  
W. 4766 " *pinnata* (R. & P.) Macbr. var. *robusta* (Brand) Macbr.

BERBERIDACEAE

- W. 4680 *Berberis Darwinii* Hook.  
W. 4681 " "  
W. 4739 " "  
W. 4905 *Berberis empetrifolia* Lam.  
W. 4901 " *trigona* Kunze  
W. 3998 *Berberis actinacantha* Mart. var. *typica*  
W. 3997 " " " var. "  
W. 4914 *Berberis crispa* Gay  
W. 4702 *Berberis microphylla* Forst.  
W. 4731 " "  
W. 4811 *Berberis montana* Gay  
W. 3665 *Berberis commutata* Eichl.  
W. 3660 *Berberis phyllacantha* Rusby  
W. 3664 *Berberis boliviiana* Lechler  
W. 3722 " "

CARYOPHYLLACEAE

- M. 4196 *Arenaria serpens* HBK.  
W. 3827 *Arenaria* sp.  $\neq$  sterile  
M. 4031 *Stellaria cuspidata* Willd.  
W. 3775 *Arenaria lanuginosa* (Mx.) Rohb.  
G. 4542 *Cardionema ramosissima* Nels. & Macbr.  
W. 6075 *Pycnophyllum tetrastichum* Remy  
W. 4770 *Spergularia* n. sp.? det. Mrs. Rossbach who is monographing genus  
M. 4166 *Spergularia congestifolia* Johnston det. Mrs. Rossbach

NYCTAGINACEAE

- M. 4125 *Colignonia acutifolia* Heimer.  
M. 4382 *Mirabilis ovata* R. & P.  
M. 4382a " "  
W. 6129 *Mirabilis Jalapa* L.  
M. 4108 *Mirabilis viscosa* Cav.  
W. 6187 *Allonia incarnata* L.  
M. 4005 *Boerhaavia paniculata* Rich.  
W. 6276 " *concinnea* Miller  
W. 3578 *Cryptocarpus pyramidalis* HBK.

CHENOPODIACEAE

- W. 6172 *Suaeda divericata* Moq/  
W. 5061 *Atriplex hastatum* L.  
W. 6193 *Atriplex*  
W. 3873 *Atriplex taltalensis* Johnston

Aizoaceae

- W. 3891 5063 *Carpobrotus chilensis* (Mol.) N.E. Br. and *Tetragonia expansa*  
W. 3877 *Tetragonia maritima* Barn.

PHYTOLACCACEAE

- M. 4302 *Hillieria latifolia* (Lam.) H. Walt.  
W. 6256 *Phytolacca bogotensis* HBK.

BIGNONIACEAE

- W. 3673 *Stenolobium arequipensis* Sprague vel valde aff.  
M. 4081 *Stenolobium* sp. apparently new  
W. 6125 *Stenolobium Garrocha* (Hieron.) Schum.  
  
W. 3771 *Delostoma Lobbii* Seeman  
W. 3675 " "  
M. 4035 *Tourrettia lappacea* (L'Herit.) Willd.  
  
W. 6014 *Eccremocarpus scaber* R. & P.  
  
W. 5164 *Argylia viridis* Phil.  
M. 4174 *Argylia radiata* (L.) Don  
W. 3865 " "  
  
M. 4339 *Dolichandra cynanchoides* Cham.  
  
W. 6132 *Pithecoctenium cynanchioides* DC.  
M. 4343 " "

Gesneriaceae

- W. 6160 *Achimenes* sp.  
M  
M. 4136 *Besleria* sp.  
M. 4158 " *lucida* Poepp.  
  
W. 4847 *Mitraria coccinea* Cav.  
W. 4670 " "  
  
W. 4692 *Sarmienta repens* R. & P.  
W. 4868 " "  
  
W. 4720 *Asteranthera ovata* (Cav.) Hanst.  
  
RUBIACEAE (incomplete)  
W. 6260 *Heterophyllaea pustulata* Hook. f.  
  
M. 4313 *Cinchona pubescens* Vahl.  
  
W. 6131 *Manettia cordifolia* Mast.  
  
W. 3656 *Arcytophyllum thymifolium* (R. & P.) Standley  
  
W. 4669 *Nertera depressa* Banks  
  
W. 4963 *Relbunium hypocarpium* (L.) Hemsl.  
  
W. 5120 *Oldenlandia thesiifolia* (St.Hil.) Schum.  
  
W. 3918 *Cruckshanksia Monttiana* Clos  
W. 4778 " *glacialis* Poepp. & Endl.

CAMPANULACEAE

- W. 4953 *Wahlenbergia linarioides* A. DC.  
  
M. 4155 *Centropogon cuspidatus* A. DC.  
M. 4130 " aff. *Macbridei* Gleason  
  
M. 4280 *Siphocampylos Orbignyanus* A. DC.  
W. 3798 " sp.

copy 34

## CAMPANULACEAE cont.

- W. 4880 *Lobelia Bridgesii* H. & A.  
 W. 4971 " *Tupa* L.  
 W. 3777 " *nana* H.B.K.  
 W. 3940 " *excelsa* Bonpl.  
 W. 3913 " *polyphylla* H. & A. var. *angustifolia* (DC.)

- W. 4740 *Hypsela oligophylla* (Wedd.) B. & H.  
 M. 4193 " "

## GOODENIACEAE

- W. 4999 *Selliera radicans* Cav. Mixed with *Lobelia anceps* L. (no. 4999). The latter is an erect plant with thinner leaves and subsessile flowers.

## CUCURBITACEAE

- M. 4112 *Apodanthera mucronata* Cogn. a ~~dioecious~~ <sup>monoecious</sup> form

- M. 4352 *Cayapouia* sp.  
 W. 6155 " *citrullifolia* Cogn. var. *breviloba* Griseb.

## ACANTHACEAE

- M. 4056 *Dyschoriste repens* (R. & P.) Kuntze  
 W. 6149 " sp.

- W. 6145 *Beloperone Mathewsii* Lind.

- M. 4340 *Ruellia Lorentziana* Griseb.

- W. 4932 *Stenandrium dulce* (Cav.) Nees  
 M. 4189 " "  
 W. 3716 " "

## APOCYNACEAE

- W. 3790 *Mendevilla brachyloba* (Mul. Arg.) Schum.  
 M. 4267 " "  
 W. 6265 " *laxa* (R. & P.) Woodson

- W. 4718 *Elytropus chilensis* Mull. Arg.

## ASCLEPIDACEAE

- W. 3910 *Tweedia brevipes* (Ph.) Malme

- W. 6119 *Asclepias campestris* Decne  
 M. 4350 " " , equals Venturi 4350 from Tucuman

- M. 4261 *Lugonia lysimachioides* Wedd.

- W. 6235 *Mitostigma speciosum* Malme

- W. 6142 *Gonolobus hirtus* Griseb.

- W. 6150 " "  
 W. 6289 " *australis* Malme

- W. 3991 *Diplolepis Menziesii* Schultz

- W. 5185 *Cynanchum nummulariifolium* H. & A.  
 W. 3833 " sp. probably new

- W. 6130 *Philibertia* new species

LEGUMINOSAE (75)

- W. 3679 *Piptodenia macrocarpa* Benth.  
W. 3845 " "  
W. 6272 " *excelsa* (Griseb.) Lillo
- W. 5193 *Acacia Cavenia* (Molina) H. & A.
- M. 4374 *Prosopis chilensis* (Molina) Stuntz
- M. 4039 *Cassia biflora* L. var.  
M. 4260 " *latiopetiolata* Domb.  
W. 3884 " *coquimbensis* Vogel  
W. 5123 " *Closiana* Phil.  
W. 4551 " *stipulacea* Aiton  
W. 6144 " *hirsuta* L.  
W. 3652 " *tomentosa* L. f.  
W. 6112 " sp. fruit needed  
W. 6122 " sp. " "
- W. 3703 One of the *Dalbergioids*. No fruit.
- M. 4328 *Tipuana tipu* (Benth.) Lillo
- M. 4331 *Bauhinia forficata* Link. var. *candicans* (Benth.) Hass.
- M. 4380 *Caesalpinia Gilliesii* (H. & A.) Hook.
- M. 4614 *Hoffmanseggia andina* Miers  
W. 6284 " *falcaria* Cav.  
M. 4006 " *viscosa* (R. & P.) H. & A.  
M. 4177 " *gracilis* H. & A.
- M. 4364 *Zuccagnia punctata* Cav.
- M. 4377 *Cercidium australe* Johnston  
W. 3576 " *praecox* (R. & P.) Harms
- M. 4004 *Caesalpinia spinosa* (Molina) Kuntze  
M. 4048 " "
- W. 4696 *Sophora tetraptera* Aiton  
W. 5111 " *macrocarpa* Smith
- M. 4147 *Crotalaria anagyroides* HBK.  
W. 6169 " "
- G. 4593 *Lupinus microcarpus* Sims  
W. 3768 " *eriodadus* Ulbr. ?  
W. 3782 " "  
W. 3639 " "  
M. 4157 " "

Peruvian lupines are in terrible confusion and must be monographed before determinations can mean anything. I will give you a name but that is all it will be under the present circumstances.

- M. 4179 *Weberbauerella brongniartioides* Ulbr.  
W. 6282 *Amicia andicola* (Griseb.) Harms  
M. 4383 *Lathyrus macropus* Gillies  
W. 4796 " *pterochaetos* Phil.  
W. 4654 " "  
W. 5144 *Vicia nigricans* H. & A.  
W. 4784 " *apiculata* Phil.  
W. 4895 " *acerosa* Clos  
M. 4059 " *lomensis* Macbr.  
W. 5151 *Adesmia resinosa* Phil.  
W. 5181 " *phylloides* Clos  
W. 4775 " *boronioides* Hook. f.

 M. 4287 "  
 M. 4294 "  
 M. 4304 "  
 M. 4306 "  
 M. 4140 "

The Piperaceae have been so atrociously messed up by the thoroughly absurd, ~~not/very/absurd/~~ mistreatment given it by that so-called botanist Trelease, that names that mean any thing simply can not be given the species untill some sane worker puts the nomenclature and taxonomy of the family back in some sensible and practicable order. I can send these pipers to Trelease who will ~~give~~ indicate that fully three-fourths of them are new species but will probably never get around to publishing them. In any case his names will have about as much meaning as the collectors number on the label. I say leave the specimens undetermined.

Report on garden cultures

- a seed collection only
- 36.1186 equals number 3912 C. ascendens  
 36.1559 no. 3938 C. pristophylla Ph.  
 36.1302 no. 4513 C. petrophilla n. sp. This is conspecific with W. 4513.  
 36.1507 4550 C. pinnata L. A seed collection only.  
 36.1316 4582 C. corymbosa R. & P. A seed collection only.  
 36.1509 4772 C. tigris n. sp. (the photo proves this not C. foliosa)  
 36.1356 5142 C. purpurea  
 36.1623 this garden material is clearly C. campanae Phil.  
 no. 5186 is clearly C. hypericinum as previously reported.  
 36.1388 equals no. 5227 C. corymbosa R. & P. (seed collection only).  
 36.1466 6245 C. teucroides Gris.  
 36.1846 6395 C. bartsiaefolia Wedd.  
 36.1783 6428 C. tomentosa R. & P.  
 36.1830 7001 C. myriophylla Kraenzl. Your garden cultures show that  
 the C. diversifolia Kr. is only a phase of C. myriophylla.  
 36.1909 This is C. chelidonioides HBK. It is very different from the wild  
 plant, no. 7107, from which it is said to have been grown. However  
 these aquatic species are extremely variable and I am not disinclined  
 towards believing that seeds from W. 7107 could make the protean change  
 into the cultured plant you send as no. 36.1909. Could this be proved as  
 so then a dozen or more so called species would be open to suspicion.  
 No label was sent to accompany the cultured plant 36.1909  
 36.1400 equals no. 5248 I think you had best reject C. flabellifolia for this.  
 This plant of the upper Aconcagua is C. andicola Jellies Bot Mag. 1.2805  
 and I advise that you take up this name.

Please note that there has been obvious confusion as regards the correlation of  
 no. 5186 with 36.1623. I do not question the geographic source given on  
 the label of 36.1623. C. campanae is a very distinct species endemic  
 where 36.1623 is given as having been collected.

(March 1938)

BIGNONIACEAE

- 8361 *Amphilophium paniculatum* (L.) HBK.

For a representative collection of the size accumulated by Mrs Mexia and Mrs West in western and southern South America I ~~would~~ am surprized at the relatively few numbers of *Senecio*. Around 150 species is about the normal expectancy for a collection of this size and scope. Dont feel that I am disappointed; because naming *Senecios* is hard work!!

W. 3795 *Tessaria* n. sp?  
 M. 4045 *Galinsoga* ?  
 M. 4030 genus unrecognized

These three numbers are snags that need more study. I may need the help of Blake. I will defer report until later.
